

CHEESECAKE FACTORY FINANCIAL PERFORMANCE DASHBOARD

Financial Analytics & KPI Performance Review (2018–2022)

Business Objective:

Evaluated The Cheesecake Factory's financial performance from 2018–2022 through KPI-driven Excel and Power BI dashboards focused on profitability, liquidity, leverage, shareholder returns, and operational efficiency.

Key Business Questions:

- How did profitability recover after 2020?
- Did financial leverage increase over time?
- Was liquidity stable across reporting periods?
- How efficiently were company assets utilized?

Tools & Technologies:

Power BI • Excel • KPI Reporting • Financial Analysis • Data Visualization • Business Intelligence

Analysis Scope :

Profitability | Liquidity | Debt Management |
| Shareholder Returns | Operational Efficiency

Financial Analysis Framework

- ◆ • Profitability
- ◆ • Liquidity
- ◆ • Debt Management
- ◆ • Shareholder Returns
- ◆ • Operational Efficiency

Financial data was transformed into interactive Power BI dashboards for KPI monitoring and executive reporting.

Profitability

year ▼	Gross Profit Margin ▼	Operating Margin ▼	Net income margi ▼	ROA ▼	ROE ▼
2022	17.96	1.18	1.31	1.55	14.77
2021	16.33	2.81	2.47	2.59	21.92
2020	16.60	-17.52	-12.78	-9.22	-49.98
2019	16.61	4.17	5.13	4.48	22.26
2018	16.83	5.10	4.25	7.54	17.34

Profit margins declined sharply in 2020

ROE recovered steadily after 2021

Revenue trends improved post-pandemic

Operating efficiency stabilized by 2022

Liquidity

Year	Current Ratio	Quick Ratio	Working Capital
2022	0.53	0.44	-310910
2021	0.64	0.57	-230684
2020	0.58	0.52	-244708
2019	0.4	0.32	-370072
2018	0.47	0.38	-221270

Liquidity Analysis:

- Current Ratio remained below ideal benchmark levels
- Debt leverage increased steadily over time
- Liquidity pressure remained consistent across periods
- Working capital recovery improved after 2021

Shareholder_Returns

Year	Share Price	EPS	P/E Ratio	Dividend Yield	Dividend per Share
2022	35.42	0.87	40.7	2.29	0.81
2021	38.93	1.03	37.8	0	0
2020	37.06	-6.32	0	3.67	1.36
2019	38.75	2.9	13.4	3.56	1.38
2018	42.41	2.19	19.4	2.92	1.24

Shareholder Analysis:

- EPS declined during pandemic disruption
- Shareholder returns improved after operational recovery
- Stock performance reflected gradual market stabilization
- Dividend-related metrics recovered post-2020

Debt_Management

Year ▼	Debt/Equity ▼	Times Interest Earned ▼
2022	8.5	6.4
2021	7.5	7.7
2020	4.4	0
2019	4	41.5
2018	1.3	17.5

Debt Management Analysis:

- Debt-to-Equity increased significantly from 2018–2022
- Financial leverage risk expanded over time
- Interest coverage weakened during the 2020 disruption
- Dependence on external financing increased

Efficiency

Year ▼	AR Turnover Days ▼	Inventory Turnover Days ▼	Asset Turnover ▼	Fixed Asset Turnover ▼
2022	3	9	1.19	1.37
2021	5	9	1.06	1.22
2020	4	13	0.71	0.79
2019	0	11	1.2	1.34
2018	0	5	3.55	4.17

Operational Efficiency Analysis:

- Asset utilization improved after 2020
- Inventory turnover stabilized post-pandemic
- Operational recovery strengthened by 2022
- Fixed asset efficiency improved gradually

Executive Overview

Financial Performance Summary (2022)

Year

2022

ROE

14.77%
